

# INTRODUCTION

An E-sport game inspired by the famous Chocobo Racing. Here anyone can make money from individual skills and tactical thinking. The players can take part in many different actions: Register races, become an audience, predict the competition result, collect materials to build a car, open a garage or even a factory to manufacture powerful turning cars, build trading platforms, transfer related items, host a racing contest. The most astounding thing is to regenerate your own racing faerie in FE Racing and even reap huge profits from that.

# VISION & MISSION

With outstanding features such as decentralization, security, transparency, and freedom, blockchain technology offers the opportunity to build an advanced society for the Game industry. Players can closely connect with the world in the game, not just one, but a game series, with a consistent, persistent user database. It's like an OASIS\* of the real world.

We kicked off the project with four main goals

1. Create an engaging Esport Game that everyone wants to play, based on the Blockchain technology platform. Gameplay must be incredibly joyful and entertaining to keep players interested in participating in the game every day for many years. The game must have helpful features that link players together and interact like a miniature society.
2. Take advantage of the outstanding features of Blockchain to add value, overcoming existing problems in the development of traditional games.
3. Establish a deep connection between investors and players. Investors can be players and vice versa. You can thoroughly invest in the game, exploit it yourself or link up with other highly skilled players to maximize the profitability of your digital assets, creating good development opportunities best for game players from all angles.
4. Build multimedia communication system, sophisticated Ecosystem, interactive economy between games and real life. Bring profits to the community in an authentic way

# ABOUT US

## **DINH PHUONG - CEO**

Co-op PVP Mode and Quest  
The International Battle Royale  
Championship

## PHASE 11 Q4/2024

OpenWorld - Community Activities  
1. Entertainment Content Production Project  
2. Producing Branded Products  
3. E-Commerce Platform

# TOKENOMIC

Stable Token

Symbol: FC

Total supply: Unlimited

What if FC Token?

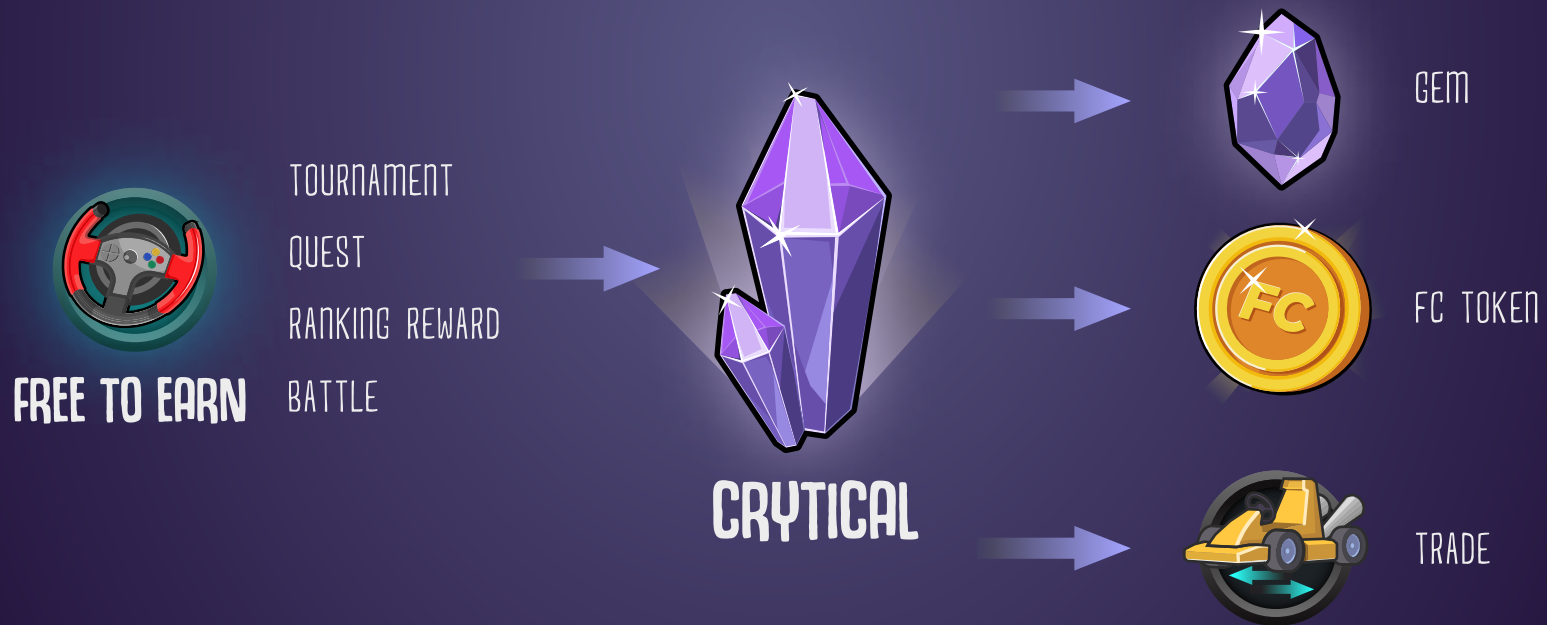

FC is a Stable Token (stable-value cryptocurrency) that mirrors the price of the U.S. dollar through the digital currency USDT, is the main financial unit in the world of OWL in general and FCRacing in particular. The token's peg to the USD is achieved via maintaining a sum of fiduciary deposits in a wallet secured by a Smart contract, this wallet is Live and public data to the community and can be easily investigated by everyone, value to the number of FC in circulation.

We use the concept of StableToken because there is a certain difference with Stablecoin.

## WHERE CAN YOU BUY FC TOKEN?

You can buy FC Token on any cryptocurrency exchange that offers it. For the latest list of exchanges and trading pairs that use this cryptocurrency. Remember to do your due diligence before choosing an exchange.

## NOTE:

FC Token was born to protect the interests of members who are players in FCRacing's community, so if you want to buy FC Token you will have to pay a fee that increases the overall value of FC Token. This will be covered in detail in the section Concept Definition: Ecosystem Funds and Staking Pool Towards a world of all games based on Blockchain technology, all of our financial information will be specific, detailed down to every coin and committed and locked with verified SmartContracts.
